Reasons for allowance

1. This communication is in response to applicant's 03/10/2006 amendment in the application of Erwin for a "method and apparatus for network analysis, such as analyzing and correlating identifiers of frame relay circuits in a network" filed 02/09/2001. The proposed amendments to the claims have been entered and made of record. Claims 1, 14, 16-38 have been canceled per Applicant's request, claims 2-4, 8, 9, 12, 13, 15 have been amended and new claims 39-49 have been added. The claims have been amended to better point out and more distinctly claim subject matter comprising the invention.

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Mr. Maurice J. Pirio (Reg. #33,273) on June 14, 2006.

4. The application has been amended as follows:

IN THE CLAIMS:

I. Claim 3: Cancel.

II Claims 2 is amended as follows:

2. (Currently Amended) A computer controlled method of analyzing a network, wherein the network has a plurality of network segments, the method comprising:

identifying segment addresses of virtual private network segments in the network, wherein pairs of segment addresses define individual virtual private network segments;

obtaining statistical data associated with each identified segment address in the network, the statistical data representing more than one type of statistic obtained from each identified segment address; and

analyzing the obtained statistical data to identify similar statistical data corresponding to the pairs of segment addresses wherein the step of analyzing the obtained statistical data further comprises the steps of:

identifying potential pairs of segment addresses;

obtaining refined statistical data associated with the identified potential pairs of segment addresses; ~~and~~

confirming that the potential pairs of segment addresses are the pairs of segment addresses based on the obtained refined statistical data; and

storing the pairs of segment addresses in a database.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2616

2 Claims 2, 4-13, 15, 39-49 are allowable as evident by applicant's amendment (Claims are renumbered as 1-23 respectively).

3. The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a nonobvious improvement over the invention patented in closest prior arts of record. The improvement comprises wherein the step of analyzing the obtained statistical data further comprises the steps of identifying potential pairs of segment addresses; obtaining refined statistical data associated with the identified potential pairs of segment addresses; and confirming that the potential pairs of segment addresses are the pairs of segment addresses based on the obtained refined statistical data, as specifically recited in the claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
